

Company Profile

About Stonytrack

Stony Track Limited is a registered privet limited company in Bangladesh. Which is owned and managed by a group of people who has many years of experience in Building, Electrical and Fire Safety along with E-commerce in Bangladesh.

Company Management :

Meet the leaders that run the business

Managing Director
Md. Mizanur Rahman

Chairman
Md. Monwarul Islam

For the past years, Stonytrack has been laser focused on one goal – designing, installing and servicing the most capable and compliant fire protection systems available in the country. Whether it's many Garments and Textile, Hospital, Commercial Complex, Residence and Other Industries in the Dhaka, Narayanganj, Gazipur, Manikganj and Chittagong Stonytrack people has the experience and knowledge to tackle the toughest fire protection challenges in any industry.

A company's ability to win is directly determined by the quality of its workforce. Stonytrack's success and reputation in the industry is a result of having the most driven and knowledgeable people on our team. Going forward, we will invest even more in our talented workforce and expand it to bring our world-class offering to a greater number of customers and industries.

When it comes to the protection of life and property, choosing the right fire protection provider is paramount. I invite you to contact us and see for yourself why so many companies and organizations choose Stonytrack.

Corporate Philosophy

Customer value creation - Our biggest priority as an international general trading organization as well as a business & financial consultant is to bring forth value to our clients in terms of negotiation, product quality and pricing.

Trustworthiness & Transparency - Communicating honestly and creating relationships is a big part of who we are.

Integrity - We abide by the rules and regulations of business society. We believe that communicating ethically and morally towards our customers is essential to corporate growth and strength. Innovation - Responding innovatively to difficult solutions is what sets us apart from our competitors. We believe that this helps us gain a fresh new perspective to problem solving.

Business Domains - To extend trading centered operations to support services vital to consumers and industry.

A full range of addressable and conventional fire detection systems, beam detection, aspiration system, gas detection systems, extinguishing aerosol system, flame detectors and power supply units. We apply the latest science and Engineering code and standard of NFPA.

Fire Detection & Alarm System

UL, FM Certificate Panel and Device

Brand

COOPER

SHIELD

HOCHIKI

Honeywell

Our UL range has multiple options for intelligent addressable sensors. All sensors are designed for optimum functionality in mid-large sized builds. They are all soft addressed and have integral short circuit isolators.

Addressable Sensor base UCAB300

Specifically designed for use with all of our UL Addressable Sensors, The UCAB Base will be used in all builds.

Optical Smoke Sensor ULCAP320

Fastest Response to Slow Burning or Smouldering Fire Which Give rise to Large Visible Smoke Particles.

Photo-Thermal Sensor ULCAPT340

Responds Quickly to Fast Clean Burning Fires. Maintains The Advantage of Optical Sensors When Detecting Smouldering Fires.

Heat Sensor ULCAH330

Environments Where the Ambient Conditions Might Cause False Alarms With Smoke Detectors Areas With High Levels of Dust or Fumes.

Pull Stations

The Addressable Pull Stations Are Constructed of High Quality, Die Cast Metal for Long Lasting Performance. The Range Consists of The UL Listed MPS Range of Pull Stations.

Horns and Strobes

Our UL Range Incorporates a Variety of Audio and Visual Notification Devices. Each Device has up to 48% Savings in Current Draw Compared to Similar Products.

Reflective Beam Smoke Detector

Loop powered reflective beam detectors are available in this range of 50 to 100 meters.

Standard

Certification

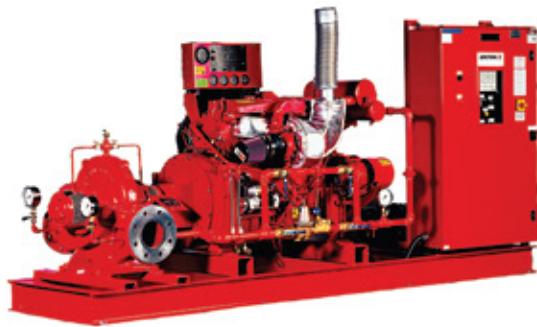

Fire protection engineering products and services, using an integrated approach for water base fire protection by standpipe, hydrant and sprinkler system. We apply the latest science and engineering code and standard of NFPA, identify the risks and examine multiple mitigation options on each project.

Existing and New Building Compliance Surveys Fire Safety Plan Review Fire Safety Design as per Code and Standard Consultation and Negotiation with Authorities

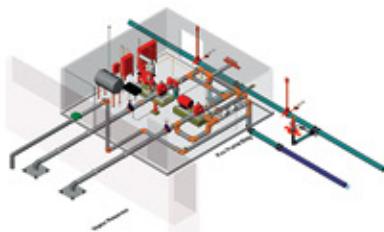

Fire & Electric Safety Consultancy

We work as an advisor or consultant to our clients and develop resourceful, practical solutions to make a proper design and drawing concepts, BOQ and as built. We also work closely with standard-enforcing authorities to develop a relationship of mutual trust and respect.

Fire Standpipe & Hydrant

STONYTRACK standpipe & hydrant design follow NFPA 14, 20, 22, 24 and 25 requirements for premises.

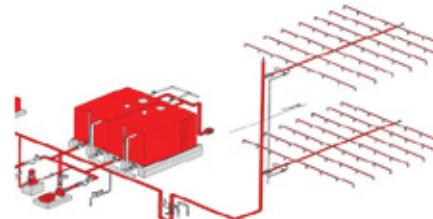

Lighting Protection (LPS)

To meet NFPA 780 requirements, STONYTRACK can develop single-line diagrams for your facility.

Fire Sprinkler System

For Sprinkler System our designer follow NFPA 13 requirements.

Fire Detection & Alarm System

To follow NFPA 72 requirements, STONYTRACK can develop fire alarm design, drawing and BOQ for your

Technical Datasheet

- * Extremely Versatile Solution
- * CFC Free
- * Extremely Fill Capabilities
- * Very Easy to Install and Finish
- * Excellent Smoke and Draft Seal Capabilities
- * Sound Dampening Capabilities

- * Paintable and Stainable
- * Easily Trimmed After Curing
- * Excellent Adhesion to most Building Substrates
- * Unaffected by moisture or Humidity When cured
- * Cures to Provide a Strong Semi-rigid Seal
